Hardware Security Module (HSM) of the AURIX[™] Platform - Face-to-Face Training

Objectives

You know the architecture, on-chip peripherals and features (especially related to the host aspects) of the HSM module of the AURIX[™] device family.

You get to write and apply low-level drivers for this hardware, interact with the host, adapt examples as required and test them with a debugger.

Numerous demos and exercises intensify the theoretic content.

YOUR BENEFIT:

Efficient and compact jump-start into the overall topic

System-wide approach

Training documentation in electronic format

Participants

Hardware and software architects, hardware and software developers, test engineers, design engineers, system designers

Requirements

HSM NDA (non-disclosure agreement) with Infineon; experience in microcontroller/microprocessor system programming and architecture; basic security knowledge; AURIX system knowledge (ideally, based on our AURIX-2G training)

Hardware Security Module (HSM) of the AURIX[™] Platform - Face-to-Face Training

Content Introduction Inside Hardware Security Module CPU Subsystem Overview System Aspects (Configuration, Boot, Reset, Debug) Bridge Timer Module and Watchdog True Random Number Generator Hash Module Advanced Encryption Standard - 128 bit (AES-128) Public Key Cryptography (PKC) Module

IMPORTANT NOTE:

A valid HSM NDA (non-disclosure agreement) with Infineon is a pre-requirement to attend the course.
